Tech Tips Safety Rules

Danger

Failure to obey the instructions and safety rules in the appropriate Operator's Manual and Service Manual for your machine will result in death or serious injury. Many of the hazards identified in the operator's manual are also safety hazards when maintenance and repair procedures are performed.

Do Not Perform Maintenance Unless:

- You are trained and qualified to perform maintenance on this machine.
- You read, understand and obey:
 - manufacturer's instructions and safety rules
 - employer's safety rules and worksite regulations
 - applicable governmental regulations
- You have the appropriate tools, lifting equipment and a suitable workshop.

The information contained in this tech tip is a supplement to the service manual. Consult the appropriate service manual of your machine for safety rules and hazards.

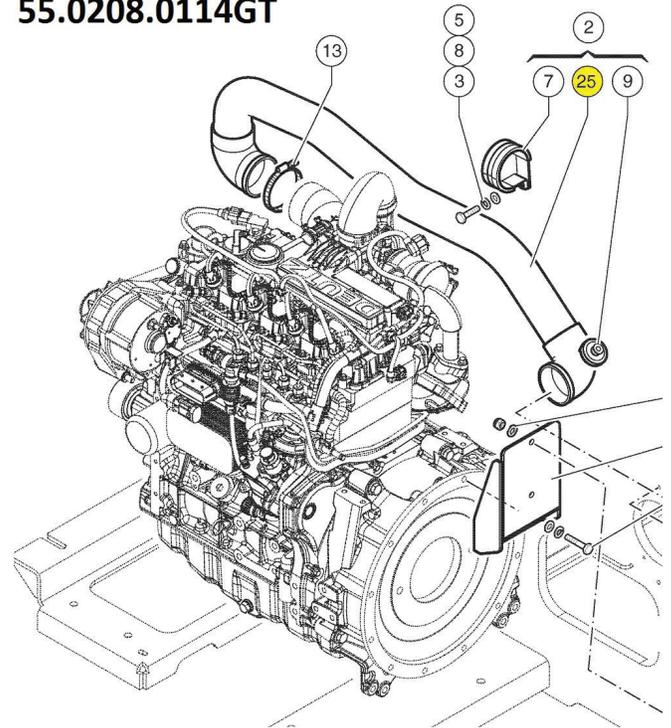

TECH TIP

Step 1

The hose on the engine can be subject to cyclic thermal break down and deteriorate over time.

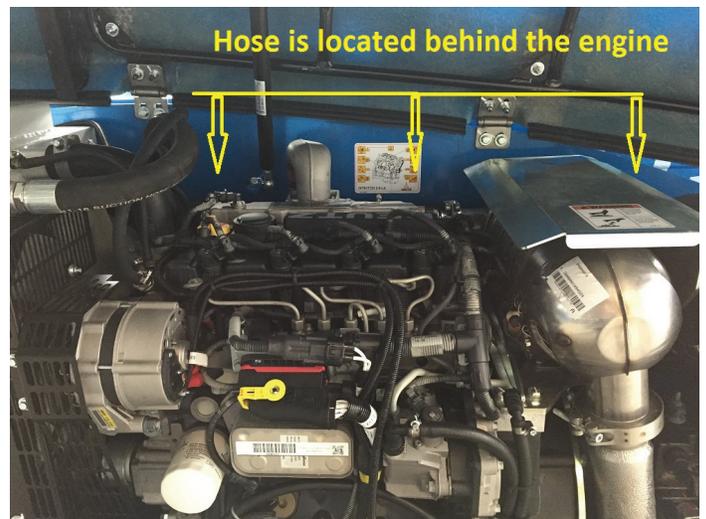

Perform this inspection daily or every eight hours.

55.0208.0114GT

Step 2

The hose should be inspected by looking over the back side of the engine with a flashlight. This procedure should be performed with a cool engine.

TECH-TIP

Step 3

Inspect the hose for any damage or holes. Picture to the right depicts a damaged hose.

Step 4

If there is any damage or holes in the hose, the machine must be taken out of service until the hose can be replaced.

Order Genie part number

55.0208.0114GT

Install and returned the machine to service.
